

# PT-6 Assessment 6

## Manual Testing

### Test Cases

#### 1. Win/Lose counter:

\*Description: When a user wins or loses a duel the correct number should increase by one on the page. (ie. User wins and the win counter goes up by 1)

\*Test Steps:

- Load Dual Duo page
- Click Draw button
- Click Add to Duo button on 2 desired bots
- Click Duel! Button at bottom
- You will see either see, "You Won!" or "You Lose!"
- Check to see if the appropriate wins or losses number went up by 1.
- Click Play Again and repeat duel until you have both won and lost

\*Postconditions:

- When I won, the losses number increased by 1
- When I lost, the losses number also increased by 1

#### 2. See All Bots button:

\*Description: When a user clicks on the See All Bots button, all of the bot description cards should appear on screen.

\*Test Steps:

- Load Dual Duo page
- Click See All Bots button
- All bot description cards are displayed

\*Postconditions: Bot description cards did not load to the page when button was pushed

## Bug Report:

\*Description: When I win a game, the losses counter goes up by one, and the wins does not.

\*Steps to reproduce:

- Load the Dual Duo page
- Click the Draw button
- Select 2 bots and Duel
- Repeat until a game is won

\*Expected Result: I would expect the wins number to increase by 1 and the losses number to stay the same.

\*Actual Result: The losses number increased by 1 and the wins number stayed the same.

\*Environment: Google Chrome Version 112.0.5615.137 (Official Build) (x86\_64)
